

ERIC S. GOLDMAN, PE, REM, CEI – EXECUTIVE VICE PRESIDENT

EDUCATION: B.S., Mechanical Engineering – Brown University; M.B.A., Operations Management – Columbia University

REGISTRATIONS: Professional Engineer – New Jersey
Registered Environmental Manager
Certified Environmental Inspector
Certified NJ UST Engineer
Certified API-653 Inspector

EXPERIENCE:

Mr. Goldman is Executive Vice President of Envar Services and its affiliate, Leonard Engineering, PC. He is responsible for supervision of all environmental compliance activities. Mr. Goldman specializes in air pollution control, spill prevention planning and environmental permitting. He also has 25 years experience in the areas of industrial plant operations and contaminated site cleanup.

- ◆ Assisting a chemical manufacturer in implementation of a comprehensive environmental compliance program, including development of spill prevention plans, facility inspection timetables, employee training programs, waste disposal plans, tank closure programs, and quarterly and annual reports;
- ◆ Preparing all state and federal permit applications for the spray booths and phosphating tanks of a contract finishing company;
- ◆ Developing air, water and hazardous waste compliance programs, including acquisition of permits and approvals, for a rotogravure manufacturer;
- ◆ Obtaining U. S. Department of Agriculture approval for the meat and poultry processing area at a food manufacturing company;
- ◆ Acquisition of federal and state permits for dust arrestors during construction of the Minolta photocopy toner plant;
- ◆ Procuring federal and state permits plus designing facility upgrades for a waste oil re-refiner.
- ◆ Procuring federal, state and city permits for upgrade of bulkheads and relieving platforms in Brooklyn, NY.
- ◆ Preparation of applications for federal and state permits to rehabilitate breasting dolphins in Elizabeth, NJ.
- ◆ Preparation of plans, specifications and applications for federal, state and city permits to repair a damaged dock in Bronx, NY.

- ◆ Preparation of applications for for federal and state permits to repair a collapsed seawall in Camden, NJ.
- ◆ Preparation of plans, specifications and applications for federal and state permits to extend and existing dock in Eddystone, PA.

Mr. Goldman has been the executive-in-charge of all contaminated site investigation and remediation since 1987. He oversees field activities and reviews submissions for all RCRA Corrective Action, UST Closure, Remedial Investigation/Action, and Emergency Response projects.

At Mobil Oil Corporation, Mr. Goldman was responsible for the completion of a nine million dollar program to replace underground tanks at 230 gasoline stations in Nassau and Suffolk Counties, NY. He coordinated layout, specifications, preparation of bid packages, bid analysis, contract awarding and construction inspection. Furthermore, Mr. Goldman supervised the company's preventive maintenance tank testing program. He was also Superintendent of a bulk storage terminal that delivered product to gasoline stations on Long Island. Mr. Goldman managed bulk terminal operations including receipt and delivery, plant maintenance and environmental compliance.
